Utility and independent power producer (IPP) Iberdrola will deploy battery energy storage system (BESS) projects in Spain adding up to 150MW/300MWh, to be co-located with ...

Spain's EUR700 million program aims to boost battery storage capacity by adding 2.5 to 3.5 gigawatts, enhancing energy stability and supporting renewable integration. The ...

In summary, Naturgy's grant funded battery expansion strengthens Spain's grid, accelerates renewable integration, and sets a precedent for future energy storage ...

This year has been particularly active: 25 of these projects have seen developments in 2025, representing 1,335.62 MW moving forward with favourable ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It ...

This pumped-storage project, approved in 2024, has a hybrid battery of 15 MW and 7.5 MWh, enabling the surplus energy from the dam to be stored. The installation optimises the energy ...

Lithium-ion batteries remain the backbone of energy storage systems here, but new players are stepping up. For example, a 2023 pilot project in Barcelona's innovation district achieved 92% ...

The facility, spanning 100,000 square meters, will be the first in the region to produce lithium iron phosphate for electric battery ...
