Designed to protect the most sensitive IT and business infrastructure against the worst power environments. Continuous power conditioning with no signal transfer time, pure sinewave output.

[LiFePO₄ Battery, Ultra-long Endurance]: This lithium UPS is equipped with a state-of-the-art Lithium Iron Phosphate Battery Pack, delivering a lifespan of over 10 years and more ...

OverviewHistorySpecificationsComparison with other battery typesUsesRecent developmentsSee alsoThe lithium iron phosphate battery (LiFePO₄ battery) or LFP battery (lithium ferrophosphate) is a type of lithium-ion battery using lithium iron phosphate (LiFePO₄) as the cathode material, and a graphitic carbon electrode with a metallic backing as the anode. Because of their low cost, high safety, low toxicity, long cycle life and other factors, LFP batteries are finding a number o...

With their high cycle life and power density, lithium UPS systems are suitable for environments requiring high energy output, such as server farms, healthcare facilities, and smart grids.

Traditional UPS systems have long relied on lead-acid (LA) batteries, but the emergence of Lithium Iron Phosphate (LiFePO₄) technology has sparked a paradigm shift in ...

Lithium Iron Phosphate (LiFePO₄) batteries have become a cornerstone of modern energy storage and electric mobility, thanks to their unique mix of safety, durability, and ...

The QuantumCore Series provides near-instantaneous protection from power interruptions and surges for data centers, hospital ICUs, banks, telecommunications, utilities, 911 call centers, ...

Can You Use a LiFePO₄ Battery in a UPS? Yes, you can use a LiFePO₄ battery in a UPS (Uninterruptible Power Supply). However, it is important to ensure compatibility with the ...
