Who owns the energy storage project?

The project is owned by Quinbrook Infrastructure Partners and developed by Wirsol Energy; Hive Energy. For more details on the latest energy storage projects, buy the project profiles here. The gold standard of business intelligence.

What are the emerging technologies for energy storage?

There are a range of emerging technologies including sodium-ion (Na-ion), hydrogen, and long-duration energy storage (LDES) that have significant potential. Na-ion batteries, for instance, offer a reduced environmental impact and safety benefits relative to lithium.

How much economic benefit will a new storage system provide?

Frontier Economics also found that those levels of storage deployment could provide around EUR12 billion (US\$13.04 billion) in economic benefit by the mid-century and lower wholesale electricity prices by, on average, EUR1/MWh between 2030 and 2050.

Listed below are the five largest energy storage projects by capacity in the UK, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to 10.5GW in May 2024. In January, the ...

Activity in the UK battery energy storage system (BESS) market continues to grow substantially year-on-year despite numerous ...

In it, you'll find the best of our energy storage content from Energy-Storage.news Premium and PV Tech Power, as well as new articles produced for this publication, including an overview of ...

Subscribe to this report to gain access to monthly updates covering all battery storage sites being planned in the UK.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in ...
