What is a fire training container?

These fire training structures offer an investment in firefighter safety by providing fire scenarios and challenges while allowing firefighters to train in safe, near real-life conditions. These containers offer a versatile environment, from realistic fire training props to unique or specialized environments such as multi-floor fire training.

Can shipping containers be used for fire training?

Our containers can easily be customized and redesigned to serve as fire training structures and first-responder training facilities for practice drills. Choosing shipping containers for these structures is a simple way to cut down on the cost of construction without sacrificing durability.

Who can use containerized fire training structures?

Our containerized fire training structures can serve a wide range of industries requiring fire and safety training including airline, military, oil and gas, petrochemical, fire departments, and training academies.

What types of fire training technologies can a container structure accommodate?

Our container structures can be designed to accommodate any and all of our proprietary fire training technologies (digital, gas fueled and carbonaceous). Enhance your training by including tactical elements such as forcible doors, cold cut panels and backdraft indicators in your design.

A low sound is deep or quiet: a low voice a low note (Definition of low from the Webster's Essential Mini Dictionary &#169; Cambridge University Press)
