What is a double glass module?

In contrast, double glass modules replace the polymer layer with another glass sheet, creating a robust sandwich structure. At IBC SOLAR, we use 2,0 mm x 2,0 mm glass layers, whereas some other market offerings use thinner 1,6 mm x 1,6 mm layers. This ensures greater durability and longevity.

What is a dual-glass module?

Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the front and on the rear with a thickness of 2.0 mm each. Some manufacturers, in order to reduce the weight of the modules, have opted for a thickness of 1.6 mm. Dualsun has chosen to stay with a thickness of 2.0 mm for reasons explained below.

What is the bifaciality of a double glass module?

Bifaciality: The bifaciality of double glass modules produces a gain of around 10-11% compared to the power measured on the front panel alone, for TOPCon type modules under so-called BNPI (bifacial nameplate irradiance) test conditions.

Are double glass modules a risk factor for PID?

Double glass modules, due to the hermeticity of their structure, present less risk of PID. This phenomenon can be avoided by the use of an appropriate encapsulation material and by quality control reinforced by tests in climatic chambers.

Double Glass is especially important in photovoltaic facilities such as solar power plants and with the expected long service life of modules such as ...

Malawi, officially the Republic of Malawi, is a landlocked country in Southeastern Africa. It is bordered by Zambia to the west, Tanzania to the north and north...

Malawi is situated in southeastern Africa. It is bordered by Tanzania to the north, Zambia on the northwest, and Mozambique on the east, south, and west. The Great Rift Valley traverses the ...

This report provides comprehensive coverage of the double glass PV module market, segmented by application (residential, commercial, PV power station, others), type ...

Discover essential travel information about Malawi, including geography, history, culture, language, economy, and political insights for a smooth journey.

The name Malawi means "flames" in Chichewa and Chitumbuka. Malawi was chosen by the first president of Malawi, Hastings Kamuzu Banda, after the country achieved its independence ...

Compared to traditional single glass modules, double glass modules offer significant advantages, particularly in terms of efficiency and durability. The rear glass layer can absorb reflected light, ...

For an entrepreneur considering a solar module factory in Malawi, the opportunity is significant. The government is supportive, and ...
