Will Mauritius start a floating power plant?

Mauritius is inviting international investors to establish and operate a floating power plant as the Indian Ocean island nation seeks to address its growing energy needs, according to a tender issued by the state-owned Central Electricity Board.

Where are the thermal power stations located in Mauritius?

Most of CEB's thermal power stations are located in the vicinity of the Port Area in Port Louis account of on-shore fuel handling facilities which are readily available for unloading of fuel. Mauritius has a good solar regime, with a potential average annual solar radiation value of some 6 kWh/m<sup>2</sup>/day.

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

How much energy does Mauritius generate?

Mauritius has a nominal installed capacity of 876.76 MW, out of which 498.47 MW are from CEB generating units and the remaining 378.29 MW are from Independent Power Producers, Medium Scale Distributed Generators and Small Scale Distributed Generators. In 2018, the total energy generated amounted to 2,827.6 GWh.

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and ...

This renewable source accounts for around 9% of the total energy mix, thanks to its use during the sugarcane crop season. While solar and wind energy are still in the early ...

With the coming up of the Central Electricity Board (CEB) and the need for reliable power, thermal power plants were constructed. The country also benefited from power from ...

In an exciting development for renewable energy in Africa, Qair, an Independent Power Producer (IPP), has successfully closed a loan to finance a significant 60MW hybrid ...
