Can LNG be used as a back-up fuel?

LNG is also gaining popularity as a supplemental or back-up fuel to compliment power generated from renewable energy sources and technologies--including solar and photovoltaics (PV) and wind power generation--which can be prone to interruption. You can learn more about our back-up power generation solutions here.

Why is Pohnpei getting new gensets?

"I am pleased to see that the topic is now addressed in this project as Pohnpei Utilities Corporation is receiving new gensets that will allow easier integration of the various renewable energy systems into the state power grid.

What is a relocatable LNG terminal?

The relocatable solution offers integrated LNG terminal functions and is suitable for small scale LNG logistics. The IPB can cater for power generation requirement from 100MW with mid-merit and load-following up to larger baseload demand.

Summary: The Micronesia Energy Storage Power Station is a critical infrastructure project supporting renewable energy adoption in Pacific Island nations. This article explores its ...

Historical Data and Forecast of Micronesia Low Power Generator Sets Market Revenues & Volume By Hybrid (Hydrogen bases, CNG, LNG, Biofuels, And Others) for the Period 2020- 2030

Karpowership is the designer and builder of the world's first floating power plants, Powerships. Powership is a floating ...
