Do you need an off-grid inverter in 2025?

If you're going off the grid in 2025, you're going to need a reliable inverter to make it all work. Off-grid inverters are the heart of a solar energy system, converting DC power from solar panels or batteries into usable AC power for your home or business.

What does a solar inverter do?

Solar inverters are an integral part of every solar power system. They perform two key functions: All solar panels generate Direct Current (DC); a solar inverter is required to convert this into Alternating Current (AC), the form of electricity usable by your home.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.
