View results and find montevideo super aluminum electrolytic capacitor datasheets and circuit and application notes in pdf format.

The electrical characteristics of aluminum electrolytic capacitors with plain (not etched) foils are, in part, better, but these capacitors are considerably larger and are only used for special ...

This application guide focuses on the application of polar, non-solid aluminum electrolytic capacitors used in ripple-filtering applications such as used as input and output capacitors in ...

Aluminum electrolytic capacitors with non-solid electrolyte have a wide range of styles, sizes and series. Aluminium electrolytic capacitors are (usually) polarized electrolytic capacitors whose ...

Standard (non-hermetic) Flatpack capacitors, types MLP (85 $\mu$ C) and MLSG (125 $\mu$ C 5000 hours) have been used extensively in military/aerospace applications for more than 30 years.

Distributor of supercapacitors / ultracapacitors for HVAC controls, computers, audio equipment, cameras, telephones, memory backup, electronic meters, scanners and industrial equipment ...

The TDK aluminum electrolytic capacitors feature outstanding ripple current capabilities and very long-term reliability. Design flexibility and engineering expertise allow ...

OverviewBasic informationMaterialsProductionStylesHistoryElectrical parametersReliability, lifetime and failure modesAluminium electrolytic capacitors are (usually) polarized electrolytic capacitors whose anode electrode (+) is made of a pure aluminium foil with an etched surface. The aluminum forms a very thin insulating layer of aluminium oxide by anodization that acts as the dielectric of the capacitor. A non-solid electrolyte covers the rough surface of the oxide layer, serving in principle as the second electrode (cathode) ...
