Are solar powered attic fans a good idea?

A solar attic fan is a great way to improve ventilation and prevent heat buildup in your attic, reducing strain on your air conditioning. But not all models are created equal. After reviewing several options, we've handpicked the 7 best solar powered attic fans that offer reliable cooling, long-term efficiency, and solid construction.

What are the best solar attic fan brands?

Popular Solar Attic Fan Brands: Some names you'll frequently encounter include Natural Light, Solatube (Solar Star series), Attic Breeze, Remington Solar, QuietCool, and GAF (the roofing giant, which offers solar-powered versions of their Master Flow attic fans). Each brand has its niche or unique selling points:

Do Solar attic fans have a motor?

Despite differences, most solar attic fans share common traits: they mount on the roof with a flashing, have a solar panel (10W on the very small end up to ~50-60W on larger units) and a DC fan motor.

Why do I need a solar fan for my roof?

Ice dams form when warm attic air melts snow on the roof, which then refreezes at the eaves and causes water backup - potentially damaging your roof and causing leaks. A solar fan helps keep the attic cold and dry in winter, so snow stays cold and in place instead of melting unevenly.

Experience powerful attic ventilation with Solatube's innovative solar attic fan technology. The Solatube's Solar Attic Fan w/ Pitched Flashing (4" high) is available in both 16W (RM1500) and ...
