They include an expansion in applications to include energy storage, plus use in battery swap systems, passenger vehicles, and commercial vehicles. CATL said this ...

China's first large-scale sodium-ion battery energy storage facility officially entered expanded operation on Wednesday in Nanning city, south China's Guangxi Zhuang ...

China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, has commissioned a 10 MWh sodium- ion battery storage station in ...

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the integration of high shares of renewables ...

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the ...

This is currently the world's largest sodium-ion battery energy storage project and marks a new stage in the commercial operation of sodium-ion battery energy storage systems, ...

As China's first large-capacity sodium-ion battery energy storage station, this project is part of the national key research and development plan focusing on "hundred-megawatt-hour-level" ...

This station integrates the storage advantages of lithium and sodium batteries, broadening application scenarios for sodium-ion battery storage in China and accelerating the ...
