In a recent article published in Clean Energy journal, entitled "100% renewable energy with pumped-hydro-energy storage in Nepal", we outline how the country can meet its ...

Solar could play a critical role in addressing Nepal's seasonal energy imbalance, especially when integrated with storage solutions if strategically deployed.

In a recent article published in Clean Energy journal, entitled "100% renewable energy with pumped-hydro-energy storage in Nepal", we ...

This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy.

Nepal has vast low-cost off-river pumped hydro-energy-storage potential, thus eliminating the need for on-river hydro storage and moderating the need for large-scale batteries.

Representing Nepal at the launch were Nepali Ambassador Bharat Kumar Regmi, Gham Power CEO Anjal Niraula, and teams from Swanbarton and Practical Action. This ...

With costs declining, technology improving, and energy demands rising, this is the ideal moment for Nepal to embrace solar with battery systems. Doing so will strengthen the ...

Building on a successful 100 kW residential microgrid, this project aims to demonstrate a larger, industrial-scale smart solar storage microgrid at a steel factory in ...
