Why is SK TES launching a new battery recycling facility in Rotterdam?

The newly established Rotterdam facility signifies a significant investment in meeting the needs of the electric vehicle (EV) and battery production markets. September 9,2024,Rotterdam,NL. - SK Tes,a global leader in battery recycling solutions,is proud to announce the opening of its state-of-the-art battery recycling facility in Rotterdam.

Why is Rotterdam launching a new battery recycling plant?

The new plant in Rotterdam is being called a significant milestone towards providing closed-loop solutions essential for the burgeoning electric vehicle (EV) industry. With the demand for battery production materials outstripping supply,it is a circular investment in the future of battery recycling.

How big is the new Rotterdam facility?

The new Rotterdam facility,initially some10,000 square meters (107,000 square feet) in size,has been designed to grow to 40,000 square meters(nearly 430,000 square feet) if future market conditions dictate it.

Nov 21, 2024 &#183; Singapore-based SK tes has opened a new lithium battery recycling plant in Rotterdam, the Netherlands. The plant has initial capacity to process 10,000 tons of EV

SK tes plans to expand its operations in Rotterdam with a second plant scheduled for completion by the end of 2025. The company, which operates recycling facilities in ...
