Increasing the adoption of minimum energy performance standards and labelling (MEPSL) for lighting, refrigeration and air-conditioning as well as introducing electric vehicles ...

Infratec has delivered European Development Fund contract to design, supply and install a HV network, two power stations and a 150kW solar PV system on Kiritimati Island in the Republic ...

The EKLIPSE project aims to sustainably improve power supply and access in the Line Islands with a focus on renewable energy (solar PV and BESS integrated with existing diesel ...

Increasing the adoption of minimum energy performance standards and labelling (MEPSL) for lighting, refrigeration and air ...

Another significant area for development is Kiribati's energy infrastructure. With a high reliance on diesel fuel for electricity, the country is looking to shift toward renewable ...

Completed in Q1 2025, this 3.5MW/14MWh facility combines lithium-ion batteries with AI-driven energy management. Wait, no - actually, it's using a hybrid system.

The "Electrification of Kiribati's Line Islands Powered through Solar Energy" (EKLIPSE) project, launched in mid-2024, aims to enhance power security by integrating solar ...

Increasing renewables in power supply provides the highest potential in GHG emission reduction as well as improves energy security. In June 2024, MISE, in collaboration with the ...
