Due to the variety of the different stakeholders, CharIN is taking the responsibility to bring them together and propose technical details for bidirectional charging.

The Federal Aviation Administration (FAA) was awarded a UESC for the installation of solar photovoltaic carports at both sites and included the installation of conduit and junction boxes to ...

In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or arrive ...

On December 13, 2018, the New York State Public Service Commission (Commission) issued the Order Establishing Energy Storage Goal and Deployment Policy ...

This paper introduces a novel testing environment that integrates unidirectional and bidirectional charging infrastructures into an existing hybrid energy storage system.

The objective of this article is to propose a photovoltaic (PV) power and energy storage system with bidirectional power flow control and hybrid charging strategies.

To this end, an intelligent bidirectional charging management system and the associated components of EVs were developed and tested in a real environment to be able to ...

New to the 2026 edition of the National Electrical Code (NEC), new Article 624 is being introduced to cover the electrical conductors and equipment connecting an electric self ...
