The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch ...

Portugal: Portugal has unveiled a \$480 M (EUR400 M) investment package to modernise its electricity grid and significantly expand battery energy storage systems (BESS), ...

Here, we shed light on the attempts made by the Portuguese government (and mining companies) to create a new lithium frontier in the Portuguese countryside and the ...

Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment ...

Portugal is still in the early phases of its energy storage cycle, creating a unique opportunity for first movers. Recent policy changes allow for co-located solar and storage ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Biogas microplants, batteries, pumped hydro, and emerging technologies like green hydrogen form a stability ecosystem that will allow Portugal not only to maintain its ...
