Are collapsible containers airworthy?

Yes, all our collapsible containers comply fully with civil aviation regulations. They are completely airworthy, and they can be restrained directly by the Cargo Loading System of any compatible aircraft. Are special tools needed to operate a collapsible ULD? You don't need any special tools to operate our collapsible containers.

What is a collapsible container?

Collapsible containers can be used to transport cargo in the usual way, but they can also be folded and stacked when you need to store or reposition them. This feature maximises your ULD storage capacity and lets you relocate empty ULDs more efficiently and cost-effectively, which in turn helps rebalance ULD stocks around the world.

Are the containers designed to be easy to replace?

Yes, the containers are designed so that parts are easy to obtain and replace. Are all your ULDs certified? VRR can deliver both certified and uncertified ULDs. If you would like to know the difference between a certified and uncertified ULD and understand their respective advantages, please read our detailed explanation.

How do our containers survive the rigours of air transport?

To ensure our containers survive the rigours of air transport, we use high-quality aluminium alloys and custom-designed extrusions. And if a container ever gets damaged? The material and design make repair easy and affordable. We maximise the internal volume of all our containers based on innovative design concepts.

Paired with EU Innovation Fund grants and Maxbo Solar's airport-tailored expertise, the Airport Decarbonization BESS Container Europe is the shortcut Europe's airports need to ...
