Who are PNNL's energy storage researchers?

A handful of PNNL's highly cited energy storage researchers. From left to right: Jie Xiao, Yuyan Shao, Jason Zhang, and Jun Liu. (Photo by Andrea Starr | Pacific Northwest National Laboratory) PNNL's energy storage experts are leading the nation's battery research and development agenda.

What is the energy storage program?

Cost reductions through capacity and transmission payment deferral. The Energy Storage Program also seeks to improve energy storage density by conducting research into advanced electrolytes for flow batteries, development of low temperature Na batteries, along with and nano-structured electrodes with improved electrochemical properties.

What is OE's energy storage program?

As energy storage technology may be applied to a number of areas that differ in power and energy requirements, OE's Energy Storage Program performs research and development on a wide variety of storage technologies.

What does an energy storage expert do?

Our energy storage experts work with manufacturers, utilities, project developers, communities and regulators to identify, evaluate, test and certify systems that will integrate seamlessly with today's grid, while planning for tomorrow.

NLR researchers are designing transformative energy storage solutions with the flexibility to respond to changing conditions, emergencies, and growing energy ...

The Southwest Research Institute's (SwRI) Energy Storage Technology Center (ESTC) is the collaborative effort of a broad range of technology experts from diverse scientific fields. The ...

Chapters discuss Thermal, Mechanical, Chemical, Electrochemical, and Electrical Energy Storage Systems, along with Hybrid Energy Storage. Comparative assessments and ...

As energy storage technology may be applied to a number of areas that differ in power and energy requirements, OE's Energy Storage Program performs research and development on a ...

This paper presents a comprehensive review of the most popular energy storage systems including electrical energy storage systems, electrochemical energy storage systems, ...

Learn more about the innovative energy storage projects happening at NLR. NLR's electrochemical storage research ranges from materials discovery and development to ...

As a leading provider of utility-scale energy storage solutions, ECI has designed world-class Battery Energy Storage Systems (BESS) with capacities up to 506 MW and 2024 MWh, ...

Our energy storage experts work with manufacturers, utilities, project developers, communities and regulators to identify, evaluate, test and certify systems that will integrate seamlessly with ...
