tems (BESS) are emerging as key enablers. Having energy storage in Chile is no longer a luxury asset but has become an "absolute necessity", explains Alejandro McDonough, business ...

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, the country is exploring different ...

A new power sufficiency regulation, which essentially operates as a capacity mechanism - a method of securing enough generation and storage assets to guarantee ...

This article delves into the current state of BESS in Chile, exploring its role in addressing curtailment challenges, the historical context of battery implementation, and future ...

This article explores the reasons behind high photovoltaic energy storage expenses, analyzes regional trends, and offers actionable solutions for businesses and communities.

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged ...

Felipe Gallardo, director of studies at the Chilean Association of Renewable Energy and Storage (ACERA), said several factors have driven the growth of photovoltaics.

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity ...
