LAS VEGAS--(BUSINESS WIRE)-- Quectel Wireless Solutions, an end-to-end global IoT solutions provider, today announces the launch of the world's first 5G-advanced (5G-A) ...

"Our latest 5G NR Release 17 modules feature unprecedented performance and significant advantages in communication capability. I believe they will provide an excellent Sub ...

Quectel RM502Q-GL is a 5G module optimized specially for IoT/eMBB applications. Adopting the 3GPP Release 15 LTE technology, it supports both 5G NSA and SA modes.

Quectel RM502Q-AE is a 5G module optimized specially for IoT/eMBB applications. Adopting the 3GPP Rel-15 LTE technology, it supports both 5G NSA and SA modes.

Frequency from 600 MHz to 40 GHz can be supported by 5G Network. MIMO (Multi-In Multi-Out) technology applied to both base station and end device guarantees both enhanced throughput ...

5G modules connect IoT devices to the cutting edge of cellular networks, with ultra-high data rates and ultra-low latency - enabling applications as diverse as remote surgery, autonomous ...

An industrial grade 5G module for IoT/eMBB applications, supporting both 5G NSA and SA modes. Compatible with Quectel's M.2 LTE-A module and provides global coverage across ...

This is a list of Quectel's communication modules (3G/4G/5G). We also introduce points to consider when selecting a module.
