How much does an engine replacement cost?

A typical engine replacement could cost between \$2,000 and \$10,000, depending on make, model, age, availability, labor cost, and other crucial factors. This range may skew higher for luxury vehicles and high-end sports cars. Here are a few specific examples of factors that may vary the cost of an engine replacement:

How much does a remanufactured engine cost?

The replacement cost is going to vary greatly based on the vehicle, the year, and the type of engine you choose. It could be from \$2000 to more than \$10,000, and pricing it out based on your needs is key. Are remanufactured engines a reliable and cost-effective option?

What factors affect engine replacement cost?

The make and model of your vehicle will significantly affect the engine replacement cost, and is perhaps the most important factor. A common model with readily available parts might have lower costs, while luxury or exotic vehicles can demand a high price not only for the engine itself but also for specialized labor.
