Is a battery energy storage project coming to Naval Base San Diego?

An \$8 million battery energy storage project is coming to Naval Base San Diego, using zinc-based technology that its makers tout as nonflammable. Eos Energy Enterprises announced Tuesday the stand-alone system will help boost reliability of operations at the base and provide energy resilience to the U.S. Navy's western fleet.

What is the Seguro energy storage project?

By delivering stored power when it is most needed, the Seguro storage project provides flexibility that will be critical to helping the San Diego region meet its decarbonization goals and California achieve 100% carbon-free energy by 2045. AES' Seguro energy storage project is a planned facility in California.

Did San Diego County conduct a public scoping meeting for Seguro energy storage?

San Diego County conducted a public scoping meeting for the Seguro Energy Storage project. Read more here. It's important to remember that fires and thermal runaway incidents at battery storage facilities are rare occurrences.

Where are SDG&E battery systems installed?

Typically, these battery systems and microgrids are installed on SDG&E-owned property; they are adjacent to our existing substation facilities or in critical locations where grid reliability and resiliency is needed most.

Gateway Energy Storage is a lithium-ion energy storage facility located in Otay Mesa, CA (San Diego County). The project provides energy storage services for the wholesale energy market.

Eos Energy Enterprises announced Tuesday the stand-alone system will help boost reliability of operations at the base and provide energy resilience to the U.S. Navy's western fleet.
