How long will Sana solar last?

The company will operate and maintain the plant for the next 25 years. The SANA plant stands out for its smart, sun-tracking design. It uses over 98,000 solar panels mounted on 13,000 flexible poles that move with the sun to maximize energy collection throughout the day.

What is i Sana Systems?

i Sana Systems is a company Founded in 2014 by industry leaders and innovators with a vision to provide product engineering outsourcing services. It boasts deep state-of-the-art technology expertise across a wide range of skills, helping it sustain a competitive advantage in the marketplace.

Is Sana a win for the environment?

"SANA isn't just a power plant; it's an investment in our people, especially young Emirati talents who played a key role in building it." Many of the engineers behind the project are local university graduates, making the initiative not only a win for the environment but also a success in developing national talent.

Is Sharjah's first solar power plant sustainable?

Sharjah: In a major milestone for sustainable energy in the UAE, Sheikh Sultan bin Ahmed bin Sultan Al Qasimi, Deputy Ruler of Sharjah and Chairman of the Sharjah Petroleum Department and Sharjah National Oil Corporation (SNOC), inaugurated "SANA" -- the emirate's first solar power plant -- on Wednesday morning.

Known as the SANA solar plant, the project will supply clean energy to the Sajaa Gas Complex while feeding surplus electricity into the Sharjah Electricity, Water and Gas ...

Sharjah has inaugurated its first solar power plant, SANA, a landmark 60-megawatt renewable energy project designed to reduce ...

The 60-megawatt "Sana" solar power plant can produce clean energy sufficient to power approximately 13,780 homes annually, thereby ...

The 60 MWp SANA facility, developed in collaboration with a Masdar-EDF joint venture, is among the first in the region to integrate solar power into oil and gas operations.

Sultan bin Ahmed inaugurates Sharjah's 1st solar plant "SANA". It is one of the world's first large-scale oil & gas processing facilities to meet its own electrical needs--and ...

It is one of the world's first large-scale oil & gas processing facilities to meet its own electrical needs--and export surplus power--using on-site solar generation.

How does the SANA solar plant operate, and what makes it unique compared to other solar facilities? The innovative thermostatic technology in the SANA Solar Plant enables ...

Sultan bin Ahmed inaugurates Sharjah's 1st solar plant "SANA". It is one of the world's first large-scale oil & gas processing ...
