Should you buy or share solar panels?

Basically, you can still glean the benefits of solar energy--such as reduced energy and environmental costs--by becoming part of a collective system sharing solar panels as opposed to buying your own.

Why should you buy a solar system?

Flexible financing and low monthly lease options can help you secure the best price for your solar system. By installing solar panels, you can also reduce your reliance on traditional energy sources. Power your home with emissions-free, renewable energy directly from the sun.

How much does a solar system cost?

A small solar home system fits most budgets: Entry-level: \$100-\$200 gets you a 50W panel, small battery, and basics. Mid-range: \$300-\$500 for 100W-200W systems with bigger storage. Extras: Cables, mounts, or upgrades might add \$50-\$100.

Are solar panels a viable alternative to solar power?

Solar power is undoubtedly at the forefront of the renewable energy movement. However, it's a common assumption that the only way to capitalize on this "clean" power option is by adding solar panels. Fortunately, today there are many viable solar panel alternatives that allow everyone the opportunity to harness the sun's rays.

No electric bills, no noisy generators--just clean, free energy. That's the magic of a small solar home system. These compact, ...

Fortunately, today there are many viable solar panel alternatives that allow everyone the opportunity to harness the sun's rays. Even if it's on a small scale, read on to ...

For many people, powering their homes or small businesses using a small renewable energy system that is not connected to the electricity grid -- called a stand-alone system -- makes ...

Discover off-grid energy solutions with solar panels, battery storage, and hybrid setups to gain full energy independence and avoid outages.

Think solar energy requires rooftop panels? Think again. Learn how you can access clean, affordable solar power--even if you rent or can't install panels.
