-----

The data sheets below contain detailed technical product descriptions, including color, chemical composition, mechanical and thermal properties and solar performance values.

Specifications of our photovoltaic glass for buildings.

Onyx Solar photovoltaic glass can be customized to optimize its performance under different climatic conditions. The solar factor, also known as "g-value" or SHGC, is key to achieve ...

Onyx Solar photovoltaic glass can be customized to optimize its performance under different climatic conditions. The solar factor, also known as "g ...

Solar glass specifications typically include properties like solar transmittance, thickness, iron content, and mechanical characteristics like tensile strength and Young's modulus.

Developed for space, SCHOTT® Solar Glass offers a wide range of technical advantages. It ensures long-term stability, optical performance and reliable protection, supporting ...

This paper is intended to assist both the glass fabricator and end user by providing an overview of the most important properties pertaining to glass used in photovoltaic applications.

Developed for space, SCHOTT® Solar Glass offers a wide range of technical advantages. It ensures long-term stability, optical performance and ...
