How solar panels function in a power outage? Solar panels are pretty amazing technology--they convert sunlight into electricity using photovoltaic cells. These cells are like ...

Community solar projects are aimed at providing access to solar energy for all local ratepayers, including those without the means or opportunity to install solar panels on their own...

Wait... Why Would Solar Turn Off in a Power Cut? Here's how it works: Most solar systems in the UK are grid-tied. That means they're designed to send excess electricity back ...

Reality is sinking in for an industry that hoped the robust presence of clean energy projects in Republican areas would save it from ...

Solar panels can work in a power cut, but only if your installer sets them up with that ability. Here's how it works and when it's worth it.

A \$7 billion program designed to reduce electricity bills while increasing the use of rooftop solar is facing potential cuts from the Trump ...

Most solar panels don't work during a power cut -- they automatically shut down for safety unless you have a battery or off-grid system. Hybrid solar systems and batteries with ...

Without tax credits, the cost of wind and solar plants will go up. Companies are likely to respond by building fewer of those projects, and ...
