Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will ...

First solar plus battery energy storage PPA signed in the Spanish market will allow Zelestra to build a 170 MWdc solar and 400 MWh battery storage hybrid project to supply ...

The majority of the funding will go to co-located (hybrid) energy storage projects, which account for 69 awards, primarily paired with solar photovoltaic and wind power ...

Furthermore, nine projects combine storage with thermoelectric facilities, while four integrate both solar and wind generation with storage systems. The programme, implemented ...

Spain invests EUR148.5M in solar-plus-storage projects, making battery systems mandatory for renewables and setting a new EU energy standard.

The Spanish Minister for the Ecological Transition and the Demographic Challenge (MITECO) has selected 126 projects with a combined capacity of 2.2 GW/9.4 GWh on its call ...

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling ...
