What are the ISO container specifications?

This information is provided as a convenient quick reference only. This information is subject to change without notice and is outside of the control of Tandemloc. These ISO container specifications were developed from ISO Standards 668, 1161, 1496 and 3874, and include key details related to container dimensions and handling.

What are the sizes & dimensions of a shipping container?

SeaRates provides an overview of the sizes and dimensions of each Shipping Container, including the External and Internal Dimensions for 20ft, 40ft, and 45ft Containers.

Why are standard containers called ISO containers?

The standard containers are also called ISO containers due to the flexible and multimodal applications provided by the International Organization for Standardization. Find dimensions, sizes and specifications for all shipping container types. Find out which type of container is best suited for your shipment.

How tall is a shipping container?

The height of each shipping container varies between standard height (8 feet 6 inches) and "high cube" (9 feet 6 inches), which are often used to increase storage space or create better air circulation. Check out the table below for a breakdown of shipping container dimensions and specifications.

View ISO container dimensions and specs for 10ft, 20ft, and 40ft containers. Understand common measurements, weights, and structural design features.

ISO Container Lifting Nominal Lengths of Freight Containers Summary of Allowable and Not Allowable Lifting Methods For the purpose of container handling and securing, a "loaded container" is a container other than in the tare (empty) condition. Unless otherwise confirmed, containers should be treated as loaded. The term loaded means the maximum gross weight rating of the container. Wind and other environmental conditions must be considered when handling or securing con... For the purpose of container handling and securing, a "loaded container" is a container other than in the tare (empty) condition. Unless otherwise confirmed, containers should be treated as loaded. The term loaded means the maximum gross weight rating of the container. Wind and other environmental conditions must be considered when handling or securing containers.
