"The Rooftop Solar Power Generation Project has installed a total of 70MW solar panels which was originally planned for 50MW. This ...

PIDG invests in Greenpower SL, a rooftop solar independent power producer in Sri Lanka. The investment will double the company's installation capacity.

As the project also includes a 12 MWh battery storage facility, it is expected to provide strong support in maintaining stability within the national electricity system.

In addition, several regional infrastructure development initiatives, new employment opportunities and social welfare projects have been planned alongside this project.

In this in-depth guide, we explore the current state of solar farms in Sri Lanka, technological advancements, government support, investment ...

To secure a sustainable future and overcome current economic challenges, Sri Lanka must strategically leverage its abundant ...

To secure a sustainable future and overcome current economic challenges, Sri Lanka must strategically leverage its abundant renewable energy resources, with a clear focus ...

"Globally, solar projects are happening on a very large scale, but in Sri Lanka the scale is smaller. To meet its net zero targets, the government is aiming for a much larger stake ...
