Explore the rapid growth of Switzerland's home solar storage market. Learn about key drivers like federal incentives, rising demand, ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail ...

The integrated 129kWh energy storage facility allows you to store surplus energy produced, which makes it possible to use it in periods of less sunlight or increased demand, ensuring continuity ...

It combines solar PV, battery storage, inverters, and energy management in a rugged container. Ideal for autonomous energy supply wherever grid access is unavailable or undesired.

Our cutting-edge technology seamlessly integrates renewable energy sources with advanced storage and cloud computing capabilities. Each solution is customized to meet the specific ...

Energy Vault's primary product is a gravity battery to store energy by stacking heavy blocks made of composite material into a structure, capturing potential energy in the elevation gain of the ...

A Swiss start-up has created a containerized movable PV system that is designed to be easily relocated to allow the use of solar energy in locations where a fixed installation is not an option.

With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours. Go big with our modular ...
