What is the 'solar Taipei program'?

The City has launched the "Solar Taipei Program", and proposed four major directions (tenders for municipal properties, subsidies for private installation, promote smart grids, establish civic power plants).

Does Taiwan have a capacity to extract solar power?

Since the government has a sufficient budget for renewable power subsidies, it implies that Taiwan has substantial capacity to extract solar power potential further and efficiently allocate the capital.

Does Taiwan have a high solar energy production rate?

According to the Taiwan Central Weather Bureau, the observed increase in average temperature in all cities has been increasing more rapidly than expected, implying that more radiation would be received and a higher total solar energy production would be resulted.

How can Taipei achieve a 'livable and sustainable Taipei'?

In the spirit of "government leadership, industry cooperation, and citizen participation", the City has made energy-saving and carbon reduction a common goal, thereby striving toward the vision of a "Livable and Sustainable Taipei".
