The Ministry of Energy and Mines is considering new electricity pricing structures for 2024-2028 to stabilize EDL's finances.

Laos' current feed-in tariffs don't adequately value storage services. But recent amendments to the Renewable Energy Law introduce capacity payments for fast-responding assets.

Currently, the tariff rate for 40% applies to imports from Laos. This represents additional costs that importers pay when bringing goods ...

At present, Lao PDR is using the Tariff Nomenclature 2022, which commodities are classified based on the ASEAN Harmonized Tariff Nomenclature (AHTN) and Harmonized Coding ...

Laos, with its growing hydropower and solar projects, faces increasing demand for reliable energy storage to balance supply gaps. Whether you're a project investor or a policy maker, ...

With 80% of its electricity already coming from renewables (mostly hydropower), Laos is now betting big on energy storage solutions to juice up its regional influence. But how ...

Currently, the tariff rate for 40% applies to imports from Laos. This represents additional costs that importers pay when bringing goods into the United States from Laos. ...

The project aims to maximise Laos' potential as a key energy source in South-East Asia while identifying effective energy storage solutions for long-term sustainability.
