So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 2 locations across Brunei. This analysis provides insights into each city/location's potential for ...

Once operational, the facility will become the largest solar power installation in Brunei and the first to be developed under a public-private partnership model.

Strategically situated on a 32.29-hectare remediated landfill site near the capital, the solar plant transforms previously unused land into a productive clean energy asset.

In 2024, the Seri Energy Park debuted Southeast Asia's first hybrid solar-storage microgrid. By day, it stores excess solar power; by night, it powers 5,000 homes.

It will be a mega government-led solar project and the first large-scale solar effort under a public-private partnership.

In a move poised to reshape Brunei's energy landscape, a tri-national joint venture led by Malaysia's Solarvest Holdings Berhad has secured the contract to develop the country's ...

The project, to be developed on a remediated landfill site in Kampong Belimbing, marks a significant step forward in Brunei Darussalam's renewable energy efforts.

Solarvest Holdings Bhd's subsidiary, Atlantic Blue Sdn Bhd, has secured Brunei's largest national solar photovoltaic (PV) project, with a generation capacity of 30 megawatts.
