Timor-Leste needed to diversify its energy sources to move away from diesel generation which is dependent on imported fuel, by introducing renewable energy sources including solar power.

Through the training, the young specialists in Timor-Leste gain an understanding of harnessing and converting solar radiation into usable energy using solar photovoltaic (PV) technology.

A high-level delegation led by the Ambassador of Japan, UNDP Resident Representative, and INFPM Executive Director conducted a monitoring visit to assess the ...

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

The project is expected to comprise of a utility scale photovoltaic (PV) solar power plant of up to 100 megawatt (MW) and supporting infrastructure. A Battery Energy Storage System (BESS) ...

The landmark project includes drafting and negotiating a power purchase agreement (PPA) and an implementation agreement with the ...

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical ...

Explore solar project in East Timor (Timor-Leste), delivering sustainable and reliable energy solutions. Learn about our commitment to renewable energy and how we're helping ...
