Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, ...

Despite limited land availability and competition with agriculture, innovative solutions like floating solar installations on water surfaces, alongside vast rooftop solar potential, offer practical ...

In the PDMP8, Vietnam's government planned to develop two electricity storage types: pump hydro and batteries. BESS will be applied to the power system when the price is ...

Solar power capacity targets have been raised to between 46,459 MW and 73,416 MW. BESS capacity will support this growing share of solar and wind power in Vietnam's energy mix, ...

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements ...

Despite limited land availability and competition with agriculture, innovative solutions like floating solar installations on water surfaces, alongside vast ...

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, ...

There are many types of energy storage technology with different applications in modern energy systems. This paper provides an up-to-date review of these storage ...
