What is the growth rate of Europe flat glass market?

The Europe Flat Glass Market CAGR (growth rate) is expected to be around 4.9% during the forecast period (2025 - 2035). The Europe Flat Glass Market is currently experiencing significant trends that are being driven by the growing demand for sustainable construction practices and energy-efficient buildings.

How much is the Europe flat glass market worth in 2023?

The Europe flat glass market was valued at USD 30.39 billion in 2023. It is projected to grow from USD 31.8 billion in 2024 to USD 53.82 billion by 2035.

How much solar power will Europe have in 2024?

European deployment of photovoltaics has increased considerably since the year 2010. Cumulative solar PV capacity in the European Union reached over 300 GW in 2024, with industry projections anticipating total capacity more than doubling by 2030, which would take solar power's share in EU electricity generation (9.2% in 2023) over 20%.

How many glass fibres are produced in the European Union in 2019?

In 2019, the amount of glass fibres and glass wool produced in the European Union reached 923K tonnes, rising by 4.3% compared with the previous year. The total output volume increased at an average annual rate of +3.7% from 2013 to 2019; the trend pattern remained consistent, with only minor fluctuations throughout the analyzed period.

Europe is expected to lead the market, driven by stringent EU regulations and high adoption rates of energy-efficient technologies. Technological advancements such as smart glass and ...

Europe is expected to lead the market, driven by stringent EU regulations and high adoption rates of energy-efficient technologies. Technological ...

The majority of new solar power capacity is being deployed in emerging markets (non- OECD countries). Photovoltaic systems account for the great majority of solar capacity installed in the ...

In the Europe photovoltaic market, the components segment displays a varied distribution of market share among its key constituents. Cells constitute the largest portion, primarily due to ...

In 2019, the amount of glass fibres and glass wool exported in the European Union expanded modestly to

Western European glass accounts for 2.5% of solar market
