Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

Does Romania use Chinese technology in 5G networks?

In September 2019, the former US Ambassador to the European Union praised Romania for not using Chinese technology in its 5G networks. In January 2020, the US Embassy in Romania issued a statement emphasising that companies connected to an authoritarian government like China could not be trusted.

Is China leading the 5G Revolution?

China is leading the 5G revolution. With over 2.4 million base stations, the country accounts for more than 60% of all 5G infrastructure globally. The Chinese government, in partnership with major telecom providers like Huawei and China Mobile, has aggressively built this network to support industries, consumers, and digital transformation.

Does China have a 5G network?

The most high-profile Chinese presence is in Europe's 5G mobile networks. Huawei and ZTE--China's leading telecom equipment vendors--have been major suppliers of the antennas, base stations, and switches that power wireless networks across Europe.

Hence, while 5G coverage is still in progress at a constant if slow pace, ANCOM expects that by 2026 5G will be the most used one in Romania.

As Chinese telecom giants weave themselves into Europe's 5G networks, undersea cables, and smart infrastructure, they bring not only speed and savings--but strategic risk.
