What is a national 5G coverage map?

This national 5G coverage map is our attempt to provide the most accurate, up-to-date map of availability and speeds, and the first to provide a national view of true 5G coverage from multiple providers based on actual user experiences. See where this data comes from and the challenges underpinning accurate broadband maps.

Where can I get 5G from AT&T?

5G from AT&T is available in a few forms... One operates on the mmWave spectrum and is called 5G+. It's available in over 50 cities, including parts of Los Angeles, San Diego, San Francisco, San Jose, West Hollywood, Jacksonville, Orlando, Atlanta, Las Vegas, New York City, King of Prussia, Dallas, Houston, San Antonio, Waco, and others.

How do I find 5G in my area?

The best way to find 5G in your area and find towers near you is through WhistleOut's interactive map. Toggle between LTE and 5G networks on our interactive map to determine if your area has a strong 5G signal. If area near you is saturated in purple, you can expect reliable service.

Does UScellular have 5G?

UScellular's 5G internet service began on March 6, 2020. It's available through all of their plans, but coverage is quite sporadic, with some states having widespread coverage, and others with essentially no 5G access. The company's 5G network reached 1 million households by the end of 2023. See the coverage map for current coverage details.
