What is a containerized solar PV system?

Powtech's Containerized Solar PV Solution utilizes innovative hybrid technology housed within a standard 20-ft marine container, delivering up to 10,000 kWh of energy annually. The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery backup system.

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.
