Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Could cellular radios be used remotely to switch off power inverters?

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK. The hidden communications equipment could be deployed remotely to switch off inverters with potentially catastrophic results.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Why were solar power inverters disabled from China?

In November, solar power inverters in the U.S. and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among government officials, three people familiar with the matter said.

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented ...

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

Security experts analyzing grid-connected equipment have identified unauthorized communication devices that are absent from product specifications within certain Chinese ...

For months, experts examining renewable energy equipment imported from China have been quietly finding

Why are there few inverters for foreign solar container communication stations
