The wind energy sector in 2025 will continue on a growth trajectory, with technological innovations, offshore wind expansion, and ...

Global electricity demand grew by 2.6% (+369 TWh) in the first half of 2025. This increase was more than met by increases in solar (+306 TWh, +31%) and wind (+97 TWh, ...

According to data from the Federal Energy Regulatory Commission (FERC), wind energy accounted for 30.1% of the new electricity capacity added in ...

In this blog, we explore key findings from the report alongside our 2025 market predictions to offer a forward-looking view of the wind energy sector, where it stands today and what's next.

Wind advances in 2025 will include capacity increases, noise reduction, and turbine recycling. The United States is home to over 70,000 wind turbines with 153 GW of installed capacity, ...

The 2025 Global Wind Report shows global wind capacity reaching 1,136 GW, with 55 countries adding new turbines in 2024. China led new installations, followed by the USA, ...

The wind energy sector in 2025 will continue on a growth trajectory, with technological innovations, offshore wind expansion, and advancements in digitalization and ...

In this blog, we explore key findings from the report alongside our 2025 market predictions to offer a forward-looking view of the wind energy ...
