Revised in November 2024, this map provides a detailed view of the power sector in Zambia.

Zambia has five large power stations, of which four are hydroelectric and one is thermal. A fifth hydroelectric power plant is under construction at Itezhi-Tezhi Dam (120MW) along with a coal ...

Coal-fired and heavy fuel oil power stations in Zambia play a critical role in providing baseload electricity, particularly during periods of low hydroelectric output caused by seasonal droughts, ...

Zambia has five large power stations, of which four are hydroelectric and one is thermal. A fifth hydroelectric power plant is under construction at Itezhi-Tezhi Dam (120MW) along with a coal powered power station at Maamba (300MW) as of 2015. There are also a number of smaller hydroelectric stations, and eight towns not connected to the national power transmission grid are served by diesel generators.
