Can I use solarcool® glasses with vitro architectural glass?

Combine Solarcool® glasses with Vitro Architectural Glass (formerly PPG Glass) tinted glasses, such as Solargray®, Solarbronze®, Solarblue®, Azuria®; or Pacifica®, to produce an even greater range of aesthetic options. Colors are reproductions and are for descriptive purposes only.

Can zirconium dioxide be used in arcs?

It boasts a transmittance as high as 97.1 % and a pencil hardness of 5H. Zirconium dioxide (ZrO<sub>2</sub>) is renowned for its high transparency, high stability, and most importantly, excellent mechanical properties that resist external erosion. However, there are relatively few reports on the application of ZrO<sub>2</sub> in ARCs [,,].

Are ZR glass covers good for solar panels?

Zr presented an excellent anti-reflective behavior and the best mechanical performance. These characteristics point towards an improved mechanical resistance (outstanding durability) and optical efficiency thus rendering them excellent candidates for the protection of glass covers on solar panels.

What are solarcool® glasses?

Combined in a one-inch insulating glass unit (IGU) with clear glass, Solarcool® glasses offer an expansive palette of appearance and performance options with solar heat gain coefficients (SHGCs) ranging from 0.34 to 0.14 and exterior reflectance of up to 37 percent.

Zirconium dioxide (ZrO<sub>2</sub>) is renowned for its high transparency, high stability, and most importantly, excellent mechanical properties that resist external erosion.

This article reviews promising studies on the design, manufacturing, microstructure, properties, and applications of glass ...

This review looks at the field of anti-reflection coatings for solar modules, from single layers to multilayer structures, and alternatives such as glass texturing.

Zirconium oxide is used in some specialist glass formulations to increase the strength and also the refractive index. Lead free crystal glass contains up to 20% zirconium ...

Full paper Empowering ultrahigh solar reflectivity in glass-ceramics through m-ZrO<sub>2</sub> nanotwins for efficient building radiative cooling

This article reviews promising studies on the design, manufacturing, microstructure, properties, and applications of glass-ceramics containing ZrO<sub>2</sub> and relevant glass-ceramic ...

Anchored by flagship products like Solarban®; solar-control low-e glass and Starphire Ultra-Clear®; low-iron glass, Vitro Architectural Glass manufactures trusted and proven glass ...

Zr presented an excellent anti-reflective behavior and the best mechanical performance. These characteristics point towards an improved mechanical resistance ...
